COMPUTER METHODS IN APPLIED MECHANICS AND ENGINEERING 81 (1990) 369–372
NORTH-HOLLAND

SUBJECT INDEX OF VOLUME 81*

Dynamics

Implicit subdomain integration for dynamic analysis of large-scale structural systems, Y. Zhang and R.S. Harichandran (1) 57–70
Expedient implicit integration with adaptive time stepping algorithm for nonlinear transient analysis, S.H. Lee and S.S. Hsieh (2) 151–172

Finite difference methods

Infiltration from buried pipes in unsaturated soils, Y.Z. Boutros, H. Mansour El-Saadany and I.A. El-Awadi (2) 173–182

Finite element and matrix methods

Shocked transonic flow calculations using finite elements and a fictitious gas, G.F. Carey and T.T. Pan (1) 1–11
Dual zero energy modes in mixed/hybrid elements–Definition, analysis and control, C.-C. Wu (1) 39–56
The spectral overlay on finite elements for problems with high gradients, T. Belytschko, J. Fish and A. Bayliss (1) 71–90
On a stress resultant geometrically exact shell model. Part IV: Variable thickness shells with through-the-thickness stretching, J.C. Simo, M.S. Rifai and D.D. Fox (1) 91–126

A consistent co-rotational formulation for non-linear, three-dimensional, beam elements, M.A. Crisfield (2) 131–150
Expedient implicit integration with adaptive time stepping algorithm for nonlinear transient analysis, S.H. Lee and S.S. Hsieh (2) 151–172
Finite element analysis on the CONNECTION machine, T. Belytschko, E.J. Plaskacz, J.M. Kennedy and D.L. Greenwell (2) 229–254
Studies on computational reentry aerodynamics, J. Argyris, I.St. Doltsinis and H. Friz (3) 257–289
Viscous damping approximation of laminated anisotropic composit plates using the finite element method, N. Zabaras and T. Pervez (3) 291–316
Front tracking thermomechanical model for hypoelastic–viscoplastic behavior in a solidifying body, N. Zabaras, Y. Ruan and O. Richmond (3) 333–364

Fluid mechanics

Shocked transonic flow calculations using finite elements and a fictitious gas, G.F. Carey and T.T. Pan (1) 1–11

* The issue number is given in front of the page numbers.

Least-squares finite element method for fluid dynamics, B.-N. Jiang and L.A. Povinelli (1) 13 – 37
Studies on computational reentry aerodynamics, J. Argyris, I.St. Doltsinis and H. Friz (3) 257 – 289

Heat and diffusion

Infiltration from buried pipes in unsaturated soils, Y.Z. Boutros, H. Mansour El-Saadany and I.A. El-Awadi (2) 173 – 182
Front tracking thermomechanical model for hypoelastic – viscoplastic behavior in a solidifying body, N. Zabaras, Y. Ruan and O. Richmond (3) 333 – 364

Miscellaneous topics

Approximate eigensolutions for non-axisymmetric rotating compressible flows, R.J. Babarsky and H.G. Wood III (3) 317 – 332

Modern computer architecture

Finite element analysis on the CONNECTION machine, T. Belytschko, E.J. Plaskacz, J.M. Kennedy and D.L. Greenwell (2) 229 – 254

Nonlinear mechanics

The spectral overlay on finite elements for problems with high gradients, T. Belytschko, J. Fish and A. Bayliss (1) 71 – 90
On a stress resultant geometrically exact shell model. Part IV: Variable thickness shells with through-the-thickness stretching, J.C. Simo, M.S. Rifai and D.D. Fox (1) 91 – 126
A consistent co-rotational formulation for non-linear, three-dimensional, beam elements, M.A. Crisfield (2) 131 – 150
Expedient implicit integration with adaptive time stepping algorithm for nonlinear transient analysis, S.H. Lee and S.S. Hsieh (2) 151 – 172

Numerical solution procedures

Dual zero energy modes in mixed/hybrid elements – Definition, analysis and control, C.-C. Wu (1) 39 – 56
Implicit subdomain integration for dynamic analysis of large-scale structural systems, Y. Zhang and R.S. Harichandran (1) 57 – 70
The spectral overlay on finite elements for problems with high gradients, T. Belytschko, J. Fish and A. Bayliss (1) 71 – 90
Expedient implicit integration with adaptive time stepping algorithm for nonlinear transient analysis, S.H. Lee and S.S. Hsieh (2) 151 – 172
Nonlinear structural design sensitivity analysis for path dependent problems. Part 1. General theory, J.J. Tsay and J.S. Arora (2) 183 – 208

Nonlinear structural design sensitivity analysis for path dependent problems. Part 2. Analytical examples, J.J. Tsay, J.E.B. Cardoso and J.S. Arora (2) 209 – 228
Finite element analysis on the CONNECTION machine, T. Belytschko, E.J. Plaskacz, J.M. Kennedy and D.L. Greenwell (2) 229 – 254
Viscous damping approximation of laminated anisotropic composit plates using the finite element method, N. Zabaras and T. Pervez (3) 291 – 316
Approximate eigensolutions for non-axisymmetric rotating compressible flows, R.J. Babarsky and H.G. Wood III (3) 317 – 332

Optimization

Nonlinear structural design sensitivity analysis for path dependent problems. Part 1. General theory, J.J. Tsay and J.S. Arora (2) 183 – 208
Nonlinear structural design sensitivity analysis for path dependent problems. Part 2. Analytical examples, J.J. Tsay, J.E.B. Cardoso and J.S. Arora (2) 209 – 228

Shells and plates

On a stress resultant geometrically exact shell model. Part IV: Variable thickness shells with through-the-thickness stretching, J.C. Simo, M.S. Rifai and D.D. Fox (1) 91 – 126

Solutions of differential equations

Viscous damping approximation of laminated anisotropic composit plates using the finite element method, N. Zabaras and T. Pervez (3) 291 – 316

Solutions of ordinary and partial differential equations

Expedient implicit integration with adaptive time stepping algorithm for nonlinear transient analysis, S.H. Lee and S.S. Hsieh (2) 151 – 172

Structural mechanics

Dual zero energy modes in mixed/hybrid elements – Definition, analysis and control, C.-C. Wu (1) 39 – 56
Implicit subdomain integration for dynamic analysis of large-scale structural systems, Y. Zhang and R.S. Harichandran (1) 57 – 70
A consistent co-rotational formulation for non-linear, three-dimensional, beam elements, M.A. Crisfield (2) 131 – 150
Nonlinear structural design sensitivity analysis for path dependent problems. Part 1. General theory, J.J. Tsay and J.S. Arora (2) 183 – 208
Nonlinear structural design sensitivity analysis for path dependent problems. Part 2. Analytical examples, J.J. Tsay, J.E.B. Cardoso and J.S. Arora (2) 209 – 228
Viscous damping approximation of laminated anisotropic composit plates using the finite element method, N. Zabaras and T. Pervez (3) 291 – 316

Elasticity

Finite element analysis on the CONNECTION machine, T. Belytschko, E.J. Plaskacz, J.M. Kennedy and D.L. Greenwell (2) 229–254

Plasticity

The spectral overlay on finite elements for problems with high gradients, T. Belytschko, J. Fish and A. Bayliss (1) 71– 90

Viscoelastic and viscoplastic media

Front tracking thermomechanical model for hypoelastic–viscoplastic behavior in a solidifying body, N. Zabaras, Y. Ruan and O. Richmond (3) 333–364

Subsonic flow

Approximate eigensolutions for non-axisymmetric rotating compressible flows, R.J. Babarsky and H.G. Wood III (3) 317–332

Transonic flow

Shocked transonic flow calculations using finite elements and a fictitious gas, G.F. Carey and T.T. Pan (1) 1– 11

Supersonic flow

Studies on computational reentry aerodynamics, J. Argyris, I.St. Doltsinis and H. Friz (3) 257–289

Optimisation and design of structures

Nonlinear structural design sensitivity analysis for path dependent problems. Part 1. General theory, J.J. Tsay and J.S. Arora (2) 183–208
Nonlinear structural design sensitivity analysis for path dependent problems. Part 2. Analytical examples, J.J. Tsay, J.E.B. Cardoso and J.S. Arora (2) 209–228

Least squares method

Least-squares finite element method for fluid dynamics, B.-N. Jiang and L.A. Povinelli (1) 13– 37

Gas dynamics

Studies on computational reentry aerodynamics, J. Argyris, I.St. Doltsinis and H. Friz (3) 257–289

Modern computer architecture

Finite element analysis on the CONNECTION machine, T. Belytschko, E.J. Plaskacz, J.M. Kennedy and D.L. Greenwell (2) 229–254
